

## GRADY-WHITE 321 COASTAL EXPLORER

Grady-White's new 321 Coastal Explorer combines premium amenities, serious fishability, and Grady's legendary SeaV2 hull performance and is built for anglers and families who expect more from their time on the water. The transom accommodates dual Power-Pole shallow-water anchors while the bow allows the largest available trolling motors to stow and deploy without blocking the anchor locker. With a focus on both style and functionality, the helm has push-button controls, an upholstered brow, and space for dual 19-inch displays. Triple Command Elite helm chairs adjust horizontally and include flip-up bolsters, fold-down armrests, and footrests. Forward of the console a contoured cushioned lounge has a 134-quart cooler below. An aft-facing elevated deluxe mezzanine seat has flip-up bolster, fold-down Corian countertop with hideaway storage, armrests, fold-down footrest, tackle storage, and drink and rod holders. The T-top has a radio box, storage net, LED spreader lights, rod holders, LED recessed lights, radar flat and outrigger mounting plates. Port and starboard aft are two 18-gallon livewells. The lockable head console offers indirect and vanity lighting, sink with pull out shower and wall mount holder, mirror, bulk storage, Vacu-Flush head, and composite teak and holly sole.

Some of the options available include a bow thruster, Seakeeper 2 gyro stabilizer, wireless Yamaha remote control, electrically adjustable fiberglass bow table, trolling motor pre-rig kit, an outrigger kit for 18-foot crank hardtop mounted stainless steel outriggers with carbon fiber poles and SureShade electrically retractable cockpit shade with Sunbrella canvas.
