

New Boats: The Grady-White 321 Coastal Explorer!

Grady-White Boats never introduces a new model without first doing an exceptional amount of design planning and homework, and the new 321 Coastal Explorer epitomizes that philosophy in every way possible. Grady-White has managed to engineer a dazzling degree of innovation into a mere 32 feet, quite an amazing accomplishment!

This boat will do a great many things well, from hardcore fishing to luxurious family cruising. A unique set of well-executed design features make these differing missions possible, including:

- Dual electromechanically folding port and starboard sport decks (dive doors) with boarding ladders
- An aft facing elevated deluxe mezzanine seat with flip-up bolster and hideaway storage
- A large bow casting platform with cushions and infinitely adjustable electric backrests

- A forward console lounge with contoured cushion and folding armrests with a 134-qt. cooler below
- A standard T-top with radio box, storage net, LED spreader lights, rod holders, LED recessed lights, radar flat, and outrigger plates
- Three lean bar-mounted Command Elite horizontally adjustable helm chairs with deluxe cushioning, flip-up bolsters, and fold-down armrests and footrests
- Port and starboard aft 18-gal. live wells
- A lockable head console with indirect and vanity lighting, a sink with pull out shower and wall mount holder, mirror, bulk storage, Vacu-Flush head, and composite teak-and-holly sole

The ergonomically designed helm features a space-age look that looks like it would be equally at home on an aircraft, with room for two 19-inch MFDs. Power comes from twin F350 Yamahas with standard Helm Master EX and Siren's Marine Connected Boat Monitoring System. And as with all Grady-Whites, the legendary SeaV2 hull design provides a fast, smooth and dry ride.

In addition to a lengthy standard equipment list, notable options include a bow thruster, a Seakeeper 2, outriggers, and a SureShade electrically retractable Sunbrella cockpit shade. In terms of being an amazingly versatile boat, this might be the most well-engineered 32 on the water!

Specifications — Grady-White 321 Coastal Explorer

LOA w/ Swim Platforms: 32' 8"

Beam: 10' 6"

Hull Draft: 22"

Transom Deadrise: 16 deg.

Maximum HP: 700

Fuel: 220 gal.
